3. **NON-CONSENT ITEMS:**

A. **PUBLIC HEARING AND CONSIDERATION OF ORDINANCE NO. 7778:**

(Contact: Cris Valverde - Assistant Director of Planning and Development Services)

This item conducts a public hearing to consider the rezoning of the South 70ft. of Lot 5, JW Cartwrights First Subdivision of Block 239, Plemons Addition plus a 10ft. by 140ft. strip of vacated right-of-way South of said Lot, all in Section 170, Block 2, AB&M Survey, Potter County, Texas plus one-half of all bounding streets, alleys, and public ways to change from Planned Development 96B to Amended Planned Development for the expansion to existing business operations. (Vicinity: Tyler St. and Interstate-40; Applicant: Hope and Healing Place, Inc.)

B. **DISCUSSION AND CONSIDERATION of ORDINANCE NO. 7782:**

(Contact: Andrew Freeman, Director of Planning and Development Services)

This item conducts the first reading of an ordinance establishing a permit system for use of golf carts to transport passengers among certain downtown facilities and venues. This item authorizes the use of appropriately equipped golf carts to transport passengers between certain downtown establishments, parking facilities and entertainment venues. Please see the ordinance for all details, but note the following items of interest:

- It requires \$1 million liability insurance per cart.
- It specifies duties of both the Owners and Operators of the carts.
- It prohibits driving along Buchanan Street, but allows the carts to cross Buchanan at street intersections.
- It initially establishes an administrative fee of \$20 per cart for a permit.
- It provides a sunset clause of December 31, 2019. This is in anticipation that, between now and then, this registration/permit approach will be replaced with a franchised sole provider of such service, based upon an RFP and franchise ordinance, both to be brought forward by separate action, later this year.

C. **PUBLIC HEARING FOR PROPOSED ANNEXATION AND TO CONSIDER A RESOLUTION CLOSING THE PUBLIC HEARINGS AS WELL AS SETTING THE DATE FOR THE FIRST AND SECOND READINGS OF THE ANNEXATION:**

(Contact: Cris Valverde, Assistant Director of Planning and Development Services)

This item conducts a public hearing to gather comments for and against annexation of approximately 329 acres in Sections 65 and 66, Block 9, BS&F Survey, Randall County, Texas.

The land is vacant, yet is anticipated to develop with 949 single-family detached and/or attached homes, 39 acres of various non-residential uses, and a new elementary school for the Canyon Independent School District.

On March 26, Council held the first of two public hearings regarding the proposed annexation mentioned above. The second of these public hearings is scheduled for today.

As was the situation with the first Public Hearing on March 26, opening the matter for those interested in being heard will need to take place. That said, upon closing the hearing allowing those wishing to speak for or against the annexation, Council is to take action on a resolution that

“officially closes the two Public Hearings and sets the date, time, and place for the Readings of the Annexation Ordinance.”

The readings of the annexation ordinance are scheduled to take place on April 23 and April 30 and at this time, the Final Service Plan will be available for Council's analysis. The two Reading of the annexation ordinance is the point in the process, which the proposed annexation's appropriateness is determined.

D. **CONSIDERATION OF A RESOLUTION APPROVING DESIGN STANDARD MODIFICATIONS TO THE 2010 CITY OF AMARILLO HIKE AND BIKE TRAIL MASTER PLAN WITH A 2019 PLAN UPDATE:**

(Contact: Kyle Schniederjan, Director of Capital Projects & Development Engineering)

This item is to consider design standard modifications to the 2010 City of Amarillo Hike and Bike Trail Master Plan. Proposed modifications revise the Design Standards portion of the current Master Plan to address multi modal transportation demands on upcoming large infrastructure projects. The new design standards are proposed for projects with roadway design speeds 55 MPH and greater. The update also recommends fully updating the 2010 City of Amarillo Hike and Bike Trail Master Plan and recommends that the Amarillo Area MPO consider a Thoroughfare Master Plan that includes multi-modal considerations. The Traffic advisory Board, Parks and Recreation Board, and the Pedestrian and Bicycle Safety Advisory Committee have all reviewed the proposed modifications and recommend adoption by the City Council.

E. **PRESENTATION AND CONSIDERATION OF A CHAPTER 380 ECONOMIC DEVELOPMENT AGREEMENT BETWEEN CITY OF AMARILLO AND BSA HOSPITAL, LLC:**

(Contact: Andrew Freeman, Director of Planning and Development Services)

This item considers approval of a Chapter 380 Economic Development Program Agreement between the City of Amarillo and BSA Hospital, LLC for the relocation and expansion of the Harrington Cancer Center to be located on a 5.71-acre tract on the corner of South Coulter Street and Wallace Boulevard.

F. **DISCUSSION AND POSSIBLE APPROVAL OF THE GOVERNANCE AND ENDS POLICY**

Treva Harper, 2801 South Jackson Street, asked Council why they would consider building a school for the CISD and have to pay for the infrastructure. Councilmember Hays stated there were currently several CISD schools within the Amarillo city limits. Councilmember Sauer stated there is already infrastructure within the loop area. David Morgan, 9408 Rockwood Drive, stated he was in favor of the development and looked forward to moving Amarillo forward. Councilmember Hays inquired about the average values and sizes. Public hearing to consider the rezoning of the South 70ft. of Lot 5, JW Cartwrights First Subdivision of Block 239, Plemons Addition plus a 10ft. by 140ft. strip of vacated right-of-way South of said Lot, all in Section 170, Block 2, AB&M Survey, Potter County, Texas plus one-half of all bounding streets, alleys, and public ways to change from Planned Development 96B to Amended Planned Development for the expansion to existing business operations.

VICINITY: Tyler St. and Interstate-40

APPLICANT: Hope and Healing Place, Inc

Agenda Item Summary

Area Characteristics

Adjacent zoning consists of Multiple-Family District 2 in all directions.

Adjacent land uses consist of single-family detached homes to the north and west, an apartment complex to the east, and is bounded by Interstate-40 to the south.

Proposal

The applicant is requesting an amendment to the existing planned development in order to construct a 406 square foot multi-purpose room addition to the existing structure. Although at first glance the proposed addition may appear minor, because the site is part of an approved planned development site plan, any deviation in the approved site plan (building area, landscaping total, parking, etc) requires an amendment and must go through the rezoning process.

Analysis

Since 1978, this particular site has been utilized with various non-residential land uses which include its initial non-residential use of professional offices to its latest and current use as a non-profit counseling organization (Hope and Healing Place). In 2009, the latest planned development was approved and allowed for a 1,308 square foot addition on the lot (east of the existing building along the north property line).

With the above-described land uses considered low-impact, the site's proximity to Interstate-40, as well as being in an area that can be considered a mixed-use area, the various non-residential land uses of the site have been deemed appropriate. Additional considerations such as development standards that preserve the residential character of the area and strict control of signage have furthered the site's appropriateness for non-residential uses.

Below is a comparison of existing standards (Planned Development 96B) to those proposed by this amendment.

	<u>Existing:</u>	<u>Proposed:</u>
<u>Land use:</u>	Professional offices	Professional offices
<u>Landscaping:</u>	38 percent groundcover And 7 trees	33 percent groundcover And 7 trees
<u>Lot coverage:</u>	31 percent maximum	34 percent maximum
<u>Parking:</u>	7 spaces minimum	7 spaces minimum
<u>Building height:</u>	One-story	One-story
<u>Building material:</u>	Stucco and Masonry exterior	Stucco and Masonry exterior
<u>Building style:</u>	Residential	Residential
<u>Signage:</u>	1 non-illuminated Sign totaling 6 square feet	1 non-illuminated Sign totaling 6 square feet
<u>Hours of operation:</u>	8 a.m. to 6 p.m. Mon. thru Fri. (Thurs. meeting 6 p.m. To 8 p.m.)	8 a.m. to 6 p.m. Mon. thru Fri. (Thurs. meeting 6 p.m. To 8 p.m.)
<u>Setbacks:</u>	Front yard – 34ft. Rear yard – 2ft. – 1in. Side yard – 8in.	Front yard – 34ft. Rear yard – 2ft. – 1in. Side yard – 8in.

When comparing the existing and proposed standards, with exception of a slight increase in lot coverage and a minor decrease in overall landscaping (internal ground cover to be reduced), the proposed changes can be considered minor in nature.

With the bulk of the core development standards (land use, architectural, signage, and hours of operation) remaining in place in addition to the small size of the proposed addition and its' orientation towards Interstate-40 the Planning and Zoning Commission believes that should the request be approved, no detrimental impacts on the area would result.

Requested Action/Recommendation

Notices have been sent to property owners within 200 feet regarding this proposed rezoning. At the time of this writing, the Planning Department has not received any negative comments regarding the request.

Considering the above, the Planning and Zoning Commission is of the opinion that the applicant's request is appropriate and represents a minimal change to existing site development. Therefore, Planning and Zoning Commissioners recommend approval as presented.

Discuss and Consider approval of ordinance establishing a permit system for use of golf carts to transport passengers among certain downtown facilities and venues.

Agenda Item Summary

This agenda item was prepared at the request of the City Manager. It authorizes the use of appropriately equipped golf carts to transport passengers between certain downtown establishments, parking facilities and entertainment venues. Please see the ordinance for all details, but note the following items of interest:

- It requires \$1million liability insurance per cart.
- It specifies duties of both the Owners and Operators of the carts.
- It prohibits driving along Buchanan St., but allows the carts to cross Buchanan at street intersections.
- It initially establishes an administrative fee of \$20 per cart for a permit.
- It provides a sunset clause of Dec. 31, 2019. This is in anticipation that, between now and then, this registration/permit approach will be replaced with a franchised sole provider of such service, based upon an RFP and franchise ordinance, both to be brought forward by separate action, later this year.

Requested Action

Approval of the draft ordinance.

Funding Summary

Provides an administrative fee of \$20, estimated to cover costs of registration and permit issuance. Unknown how many carts may be registered so no total revenue projection available for this start-up program.

The land is vacant, yet is anticipated to develop with 949 single-family detached and/or attached homes, 39 acres of various non-residential uses, and a new elementary school for the Canyon Independent School District.

On March 26th, Council held the first of two Public Hearings regarding the proposed annexation mentioned above. The second of these Public Hearings is scheduled for Tuesday's agenda.

As was the situation with the first Public Hearing on March 26th, opening the matter for those interested in being heard will need to take place. That said, upon closing the hearing allowing those wishing to speak for or against the annexation, Council is to take action on a resolution that "officially closes the two Public Hearings and sets the date, time, and place for the Readings of the Annexation Ordinance".

The Readings of the annexation ordinance are scheduled to take place on April 23rd and 30th and at this time, the Final Service Plan will be available for Council's analysis. The two Reading of the annexation ordinance is the point in the process, which the proposed annexation's appropriateness is determined.

Requested Action/Recommendation

For this public hearing, staff recommends Council open the second Public Hearing and upon conclusion of the hearing, consider a resolution that "officially closes the two Public Hearings and sets the date, time, and place for the Readings of the Annexation Ordinance".

City of Amarillo Hike and Bike Master Plan

2019 UPDATE

Prologue

The purpose of the Hike and Bike Master Plan is to establish a system of bicycle and walking routes in the City of Amarillo. The City of Amarillo Hike and Bike Master Plan was originally adopted by the City Commission in 2003. An identified objective at that time was to update the plan every five years. The implementation of the original Hike and Bike Master Plan identified a bike system that was citywide and included bike routes, bike paths, and a Rails-to-Trails segment. The 2003 plan called for streets segments identified in the plan with sufficient width to be striped with bike lanes. These locations are primarily around schools and city parks and were designed and implemented to meet State and Federal Safety standards. Maintenance dollars have been allocated to maintain the existing bike route striping on an annual basis. Very few other recommendations from the 2003 plan have been implemented. A staff update to the original plan was issued in 2010, and very few additional recommendations from that update have been implemented. The Hike and Bike Safety committee voted to recommend staff perform a minor amendment to the plan in this 2019 Update specifically aimed at large infrastructure projects with speeds 55 MPH or greater. The committee acknowledges that public input as well as input from other City committee's including the Traffic Advisory Board, and the Planning and Zoning Board are required to make comprehensive changes to the Master Plan; however, this amendment will ensure considerations for multi-modal transportation is part of large infrastructure design during an interim period. The committee has recommended that staff present methods to City Council to fund a holistic update to the Hike and Bike Plan. Since the current plan is an integral part of the Parks Master Plan and the parks department has identified the need to update their Parks Master plan the committee recommended the Hike and Bike Plan be amended simultaneously with the Parks Master Plan. This 2019 update is intended to meet the following objectives.

Goals and Objectives

1. Evaluate and revise the Design Standards portion of the current Hike and Bike Master Plan to meet current city expansion and multi modal transportation demands on large infrastructure; thereby increasing awareness of the recommendations of the plan in the design and development community in preparation for the master plan revision.

The City of Amarillo is experiencing a period of growth and planning for future growth. The design standards for pedestrian and bike amenities are vague, difficult to interpret, and even harder to implement during the planning and development processes. Design standard should clearly identify the expectations for pedestrian and bike facilities associated with the City's public and private growth.

2. Recommend allocating the funding for and adoption of a Hike and Bike Plan that reflects current best practices of municipalities the same or larger in size than the City of Amarillo.

The Traffic Engineering Division thru the Public Works Department shall submit application for funding in the City of Amarillo Community Investment Program (CIP) for a Hike and Bike Master Plan, and commit itself to submit application for future projects identified in the proposed plan. The adoption of an updated plan should evaluate current and future funding requirements including operation and maintenance costs; consider public and private development impacts, incorporate current best practice design standards; and identify proposed capital projects that can be proposed by the traffic department for funding thru the City's Capital Plan or other identified future funding.

3. Recommend to City of Amarillo and the Amarillo area Metropolitan Planning Organization (MPO) the development of comprehensive Thoroughfare Master Plans for both organizations. These plans must coordinate with each other and incorporate considerations and expectations for multimodal transportation alternatives including pedestrian and bike.

The City of Amarillo currently has a Master Thoroughfare Map that is not up to date with current City limits; and the Amarillo area MPO does not currently have a Thoroughfare Master Plan. The City's development policies related to Arterial construction have been implemented in all quadrants of the city extending Section Line Arterials as the city annexes new areas. Most of this expansion is not reflected in the current Thoroughfare Map. Additionally the map does not outline future planning considerations or policy considerations. An updated City Thoroughfare Master plan should evaluate current and future funding requirements including operation and maintenance costs; consider public and private development impacts; incorporate current best practice design standards; identify proposed capital projects that can be proposed by the street department for funding thru the City's Capital Plan or other identified future funding; and coordinate with a regional MPO plan. The MPO boundary was modified in 2018 to include all of the City of Amarillo, the City of Canyon, and portions of Potter and Randall Counties. An updated MPO Thoroughfare Master plan should evaluate the current use and projected demands on the transportation facilities within the MPO boundary. Coordination between the

plans could include unified design, development standards, and right of way acquisition criteria that consider multi-modal transportation.

Achieving the above goals will require the cooperation of public and private entities including multiple committees, divisions, departments and individuals. This update combined with previous plans sets in motion strategies to increase awareness of, evaluate, and establish design standards, safety standards, law enforcement programs, funding alternatives, and maintenance standards. This update will be submitted to City departments and the following committees for review: Hike and Bike Safety Committee, Traffic Advisory Board, Parks Advisory Board, City Commission, and the MPO.

DESIGN STANDARDS

These standards are intended to provide design guidelines that facilitate safe and convenient travel for pedestrians and bicyclists on city right of ways and recommend design considerations for facilities with speeds 55 MPH or greater. The installation of sidewalk is required for all commercial and residential development in the City of Amarillo unless specifically waived by the City Engineer. Sidewalk design requirements including applicable portions of the Americans with Disability Act (ADA) are presented in the City of Amarillo standard details and standard specifications. The current City standard calls for 4' sidewalk in residential areas and 6' sidewalk adjacent to commercial development. The Capital Projects and Development (CP&D) Engineering department is the City department responsible for establishing and enforcing the sidewalk requirements during the public capital and private development process.

Bikes may operate on all roads in the City of Amarillo except where specifically prohibited by statute or regulation. The following Design Standards are intended to be general guidelines for the implementation of public bike infrastructure. Applicable Technical analysis, data collection, and safety analysis must be carried out for meaningful implementation of bicycle infrastructure. New pedestrian and bike infrastructure are typically constructed in one of two ways either part of a public capital project or part of private development dedicated to the City upon completion. Whenever roads are reconstructed or constructed appropriate pedestrian and bicycle amenities should be included to accommodate the public's needs. An all ages all abilities design criteria should be considered for all projects. Design professionals should consult the American Association of State Highway Officials (AASHTO) Guide for the Development of Bicycle Facilities and the National Association of City Transportation Officials (NACTO) Designing for All Ages and Abilities Contextual Guidance for High Comfort bicycle Facilities, for guidance in choosing the appropriate facility type identified below. In many cases, the best approach is to improve the existing or proposed infrastructure to accommodate pedestrians and bicyclist in accordance with state and federal policies. However, design analysis including traffic volume, speed, driveway access etc. may indicate it more appropriate to provide isolated pedestrian and bike infrastructure or a parallel route along streets with lower speeds and traffic volumes while maintaining a similar level of access to destination points. By using an all ages all abilities design criteria high traffic volumes and speeds should not be used as justification for not accommodating bicyclists but rather may necessitate the need to accommodate both the recreational cyclist and the utilitarian cyclist.

Bicycle Facility Types:

Bicycle Facility	Best Use	Motor Vehicle Design Speed	Traffic Volume	Other Considerations
Shared Lanes	Minor roads with low traffic volumes. Identified Bicycle route thru typical residential.	20 MPH or lower	Generally less than 1,000 vehicles per day	Could be used to provide alternative to busier area's or streets but may be discontinuous.
Shared Lanes (Wide outside lanes no markings)	Major roads collectors or arterials identified as bike routes where bike lanes are not appropriate because of space constraints or other limitations.	20 MPH or greater	Generally more than 1,000 vehicles per day but less than 3000 vehicles per day	As speeds and volumes increase consider providing markings to indicate the shared lane, providing paved shoulders, or bike lanes.
Marked Shared Lanes (Wide outside lanes with markings)	Major roads collectors or arterials identified as bike routes where bike lanes are not appropriate because of space constraints or other limitations.	20 MPH or greater	Generally more than 3,000 vehicles per day	Useful where on-street parking is available to limit crashes with opening car doors. Designer should look for alternative parallel facilities for less confident users.
Paved Shoulders	Non-curb & gutter sub-urban roadway section or rural state highway.	70 MPH or Less	Generally more than 3,000 vehicles per day	Shoulder width should be a minimum of 6 feet or greater depending on traffic volumes and speeds. i.e. wider shoulders on higher speed or higher volume roads.

Bicycle Facility	Best Use	Motor Vehicle Design Speed	Traffic Volume	Other Considerations
Bike Lane	Major roads, arterials and collectors that provide direct convenient access to major land uses. Also should be used on collector roads and busy residential streets with connections to recreational bike attractions such as parks and schools.	25 to 40 MPH, or high differential speed based on the average user should be evaluated	Generally more than 3,000 vehicles per day but less than 6,000 vehicles per day	Bike lanes can be implemented on nearly all streets that have sufficient space to meet public demands a traffic study should be conducted when existing infrastructure is being modified to evaluate any negative effects to the existing system.
Protected Bike Lane and/or Cycle Track	Major roads, arterials and collectors that provide direct convenient access to major land uses. Also should be used on collector roads and busy residential streets with connections to recreational bike attractions such as parks and schools.	40 MPH or greater or high differential speed between average bicycle and motorist	More than 6,000 vehicles per day, or more than 1 vehicle lane in each direction, or moderate truck or large vehicle volumes.	Where on-street parking is allowed bike lane width should be 5 feet minimum to reduce car door collisions. Intersection design required to reduce bicycle/vehicle conflicts.

Bicycle Facility	Best Use	Motor Vehicle Design Speed	Traffic Volume	Other Considerations
Shared Use Path	Linear corridors providing a separated path for non-motorized users. Intended to supplement an on-road bike network. Encouraged use where public demand exists adjacent to high speed limited access highways.	N/A	N/A	Design path with all users in mind including pedestrian and bicycle. Can be used as an alternative to on-road routes for less experienced or more recreational bicyclist. Intersection analysis and design required to mitigate conflicts with motor vehicles.

Capital Projects:

It shall be the responsibility of the City Engineer and the CP&D Engineering department to evaluate the appropriateness of pedestrian and bicycle improvements to capital projects during the project design or project review process.

Private Development and State Projects:

It shall be the responsibility of the design engineer to evaluate the appropriateness of pedestrian and bicycle improvements required based on the projects proposed use. Consideration should be given to the extension of or connectivity to existing pedestrian and bike routes. The City of Amarillo Traffic Engineer can require traffic engineering analysis in the form of a transportation impact study to justify design assumptions and disclose information to stakeholders about the potential impacts and benefits of any new development during the development review process. It shall be the combined responsibilities of all the development services departments including the Planning Department, the Traffic Engineering Department, and CP&D Engineering Department to evaluate the appropriateness of pedestrian and bicycle improvements during the development review process.

Project Maintenance:

The City of Amarillo Public Works Department shall maintain City public infrastructure during routine roadway maintenance activities including resurfacing and rehabilitation.

PRESENTATION AND CONSIDERATION OF A CHAPTER 380 ECONOMIC DEVELOPMENT PROGRAM AGREEMENT BETWEEN THE CITY OF AMARILLO AND BSA HOSPITAL, LLC

This item considers approval of a Chapter 380 Economic Development Program Agreement between the City of Amarillo and BSA Hospital, LLC for the relocation and expansion of the Harrington Cancer Center to be located on a 5.71-acre tract on the corner of S. Coulter Street and Wallace Boulevard.

Agenda Item Summary

BSA is currently evaluating and considering a proposal to relocate and expand the Harrington Cancer Center (HCC) into a new 50,000 square feet facility, which will house radiation therapy treatment rooms utilizing state-of-the-art treatment technologies and methodologies. It will also include a technology corridor, new infusion bays, strategic and flexible meeting and collaboration spaces, improved spaces for patient families and visitors, and additional support services. The new facility will not only offer high quality cancer treatment services to Amarillo residents, but is expected to attract patients from outside Amarillo and Potter/Randall counties as well. Staff believes this project meets Align Amarillo’s priority efforts to be a leader in Life Sciences innovation as BSA will be able to utilize cutting-edge cancer treatment technology at the new HCC.

BSA intends to retain the existing HCC facility to house administrative staff from the hospital system, in order to ease crowding at other facilities and allow for potential future growth.

This project is one of many capital projects under consideration by BSA’s parent company, Ardent Health Services (Ardent). As part of Ardent’s consideration for where to allocate capital, they take into account the overall tax impact and return on investment for each project. As such, securing incentives such as the one recommended can have a positive impact on the project economics and make BSA’s project look more competitive versus the other projects in Ardent’s capital pipeline.

With this in mind, staff is recommending a step-down property tax rebate that would encourage the development to occur sooner when being evaluated by Ardent. The agreement would provide an annual reimbursement at the following levels: **Years 1-3: 90%, Years 4-6: 70%, Years 7-8: 60%, Years 9-10: 50%.**

The applicant would be required to invest a minimum of \$20 million for the facility and \$6.7 million for the machinery and equipment. A building permit would be required by August 31, 2019 and a certificate of occupancy by August 31, 2021. BSA would also be required to maintain 70 existing employees with a payroll of not less than \$12 million and within 12 months following the opening of the HCC, the company shall create 7 new full-time employees with a payroll not less than \$600,000.

Requested Action

SECTION 8. EFFECT OF AN EVENT OF DEFAULT.

(1) Notice and Remedies. However, the City and the Company agree to modify the rebate provided for herein to the extent permitted by such legislative or judicial action to the fullest extent then authorized without penalty or other restriction upon the City for the payment of same.

(2) Erroneously Paid Property Tax. In the event the City Council or a court of competent jurisdiction determines that any property taxes were erroneously overpaid or underpaid by the Company to the City, an appropriate credit or offset shall be applied against the next Program Grant Payment provided for herein. If there is not another Program Grant Payment remaining under this Agreement, then Company and City respectively promise to issue to the other any and all such payments or repayments as indicated in order to balance the books for the erroneously paid property tax. Notification of any such required adjustment will be provided to the Company at the earliest practical date.
