Jason Taylor, Planner I, presented the above-proposed item. This plat is for the purpose of creating two commercial lots. The plat has been reviewed by the customary City Departments and local utility companies and with the exception of the just mentioned variance, complies with all other Subdivision and Development Ordinance Standards. As proposed, the replat would create a substandard lot to the east (remaining portion of Lot 22-B) in that the lot will not front upon a public street as required by ordinance. That said, the remaining portion of Lot 22-B would meet the minimum lot area and other minimum dimensions for its respective zoning district (Agricultural District). It must be noted that the just mentioned remaining portion of Lot 22B is entirely located in a Special Flood Hazard Area and currently serves as a playa lake. An easement for access to public right-of-way is also proposed to be dedicated via the plat to provide access. Considering the above, Staff recommends approval of the plat pending the receipt of the corrected originals prior to plat expiration with the variance.
