Lity of CAmarillo, Texas

COMMUNITY INVESTMENT PROGRAM (CIP) Fiscal Year 2022/23 – 2026/27

ORDINANCE NO. 8054

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AMARILLO, TEXAS, APPROVING AND ADOPTING THE FIVE-YEAR COMMUNITY INVESTMENT PROGRAM FOR FY 2022-2023 THROUGH 2026-2027; MAKING CERTAIN FINDINGS; PROVIDING A REPEALER; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, City Council of the City of Amarillo, Texas, has directed the City staff to prepare and present a statement of capital projects planned for the next succeeding five (5) fiscal years, with estimates of their cost; and

WHEREAS, the City Manager has presented in detail to the City Council a proposed Community Investment Program (CIP) for Fiscal Years 2022-2023 through 2026-2027; and

WHEREAS, the City Council has considered the input of the public and the recommendations of its staff and hereby determines it to be in the public interest to adopt a five-year Community Investment Program for Fiscal Years 2022-2023 through 2026-2027 to service the public health, safety, and general welfare of the citizens; and

WHEREAS, a copy of the Community Investment Program for Fiscal Years 2022-2023 through 2025 -2026 has been made available for public review and the City Council desires to adopt the Program; and

WHEREAS, the Fiscal Years 2022-2023 through 2026-2027 Community Investment Program provides a general framework to guide project planning and financing over a five-year period; and

WHEREAS, the Fiscal Years 2022-2023 through 2026-2027 Community Investment Program is based on general priorities and available financing as can be anticipated at the present time; and

WHEREAS, it is the intention of the City Council that the Community Investment Program will be updated annually and include five years of planned and affordable projects while considering projects that have been completed in the prior fiscal year.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AMARILLO, TEXAS:

SECTION 1. The findings and recitations set out in the preamble to this Ordinance are found to be true and correct and they are hereby adopted by the City Council and made a part hereof for all purposes.

SECTION 2. The certain compilation identified as the Proposed Community Investment Program for Fiscal Years 2022-2023 through 2026-2027, a copy of which is attached hereto, is hereby incorporated in full by this reference and is hereby adopted as the five-year Community Investment Program for the City of Amarillo, Texas.

Ord. 8054

SECTION 3. The Community Investment Program will be updated each year to

recognize changes in the Program as the result of completed projects, changes in project cost

and current financing capability of the City.

SECTION 4. The first year of the Community Investment Program will be

adopted each year as the Capital Investment Program for the current fiscal year through the

annual budget ordinance.

SECTION 5. Repealer. All Ordinances or parts thereof in conflict with this

Ordinance are hereby repealed to the extent of such conflict only.

SECTION 6. Severability. If any provision, section, subsection, or clause for any

reason is held to be unconstitutional, void, or invalid or for any reason unenforceable, the

validity of the remaining portions of this Ordinance or the application thereby shall remain

in effect, it being the intent of the City Council in adopting this Ordinance, that no portion

thereof or provision contained herein shall become inoperative or fail by any reasons of

unconstitutionality of any other portion or provision.

SECTION 7. Effective Date. This Ordinance shall be effective from and after its

date of final passage.

INTRODUCED AND PASSED by the City Council of the City of Amarillo, Texas,

on First Reading this the 28th day of March 2023; and PASSED on Second and Final

2

Reading the 11th day of April 2023.

Community Investment Program (CIP)

OVERVIEW

This Community Investment Program (Program) is the seventh comprehensive multi-year guide to community investments prepared

for the City of Amarillo. This effort arises directly out of the City's *Blueprint for Amarillo* effort which identifies City Council Pillars and City Manager Initiatives. This Program outlines investments the City intends to make over the next five years in interests including transportation, community planning, public facilities, public safety, utilities, and information technology. The Program recognizes the community's commitment to maintaining the more than \$1 billion in investments made in public infrastructure and facilities over the past 100 years and to ensuring infrastructure is available when needed to accommodate a growing community.

With each annual operating budget, the first year of the Program is adopted with the subsequent years in the Program serving as a plan for anticipated future expenditures. Each year the entire five-year CIP is reviewed and modified as necessary and appropriate. Unlike the previous five Programs this Program is not completely fiscally constrained and makes the following assumptions:

- The dedication of \$2,587,000 annually to street capital funding.
- Proposed debt issuance in year three for the Street Department during the Program.
- A proposed ongoing funding source for Traffic Department's annual capital expenditures including
 pavement marking, arterial streetlights, and traffic signal E&I of approximately \$600,000. This
 program is the replacement of the Red-Light Camera funding and adds funding for a department
 E&I capital project.
- Proposed debt issuance in year three for the Parks Department during the Program.
- No less than \$3,400,000 (dedicated for parks maintenance) annual funds available for Parks Department's annual capital expenditures resulting from a three-cent tax increase implemented during 2021/2022.
- Continued annual water and sewer utility rate increases of 4% or an equivalent alternating year
 rate increase throughout the 2022/2023 to 2026/2027 Program. Proposed Bond issuance in years
 three and four totaling approximately \$124,000,000 for the Utility Department during the
 Program.
- Proposed debt issuance and corresponding rate increases in year three for the Drainage Utility Department.
- Federal Funding allocations from the American Rescue Act and other outside sources.

The year-one Program total approved through the annual budget process for 2022/2023 includes debt of \$57.8 million, consisting of water and sewer utility bond proceeds of \$46.5 million, landfill development bond proceeds of \$6.5 million and drainage utility bond proceeds of \$5.0 million. The bulk of the water and sewer utility bonds are encompassed by three projects; the Northeast Interceptor Sewer line for \$26.2 Million, the Water Rights Expansion project for \$18 Million, and the Arroyo Outfall sewer line a part of a comprehensive plan to address odor issues in North Amarillo for \$2.3 Million.

CAPITAL ACQUISITION/IMPROVEMENT POLICY

As a part of its annual budget process, the City affirms its commitment to established financial policies. One of the established policies focuses specifically on community investments and is included in this Program to reinforce this commitment, as follows:

The City will plan and budget for the replacement of equipment and capital assets as the need arises. Minor capital replacement items will be planned for and provided in the department's operating budget. Capital replacements should be limited to items that are no longer functional, unable to be repaired, not economically repairable, or a safety hazard. Once the item is replaced, it is generally sold in the City auction.

Planning for major capital improvements is on a five-year basis and is updated annually. The City uses pay-as-you-go financing of capital acquisitions where feasible. When debt is needed to finance capital assets, the City strives to schedule bond issues so that level payments are made each year over the life of the issue and the term of the financing does not exceed the useful life to the asset.

The City of Amarillo prioritizes the funding of capital improvement projects on the basis of a five-year Capital Improvement Plan. A capital improvement is any expenditure for the purchase, construction, replacement, expansion, or major renovation of the physical assets of the city when the project is relatively expensive (more than \$25,000), long-term and permanent. Some common examples are streets, libraries, traffic signal systems, fire stations, additional trucks, and water and sewer lines. Capital needs of less than \$25,000 (minor replacement items) are provided for in the department's annual budget. The approved projects for the first year of the five-year capital improvement program are incorporated in the City's budget in the "Capital Projects" section of the budget. The functions of the Capital Improvement Program are as follows:

- 1) Planning for the eventual replacement of capital items and estimating the cost of replacement;
- 2) Scheduling all capital projects over a fixed period with appropriate planning and implementation;
- 3) Budgeting priority projects and developing revenue sources for proposed improvements;
- 4) Coordinating the activities of various departments in meeting project schedules;
- 5) Monitoring and evaluating the progress of capital projects; and
- 6) Informing the public of projected capital improvements.

The following questions are considered when justifying a project:

- 1) What is the relationship of the project to the progress of the entire city?
- 2) Is this project part of a large program? How does the project relate to the goals of the program?
- 3) How many citizens will be helped by it? How many citizens will be harmed or inconvenienced if the project is not considered?

- 4) Will it add to the value of the surrounding area? Will it increase the valuations of local property?
- 5) Will it increase the efficiency of the performance of a service? Will it reduce the ongoing costs of a service or facility?
- 6) Will it provide a service required for economic development of the community? What improvements would be of the most value in attracting commercial and industrial firms?
- 7) Is this project required to complete a major public improvement?
- 8) Will rapid urban growth in the area of the proposed project increase the costs of land acquisition if the project is deferred?
- 9) Is the project well identified by the citizens? Does it have established voter appeal?
- 10) Is the project needed to protect public health or safety?

Consistent with the City's philosophy on user fees, the City passes a portion of the cost of extending utilities and improvements in subdivisions to developers of the subdivisions rather than to the general public. Additionally, where the levels of desired city services are beyond the norm for a subdivision, Public Improvement Districts have been created to provide enhanced services without burdening the entire community.

Identified Priorities

Efforts are made to identify community investments in accordance with the above policy, however some priorities get identified by Council, staff, or a physical occurrence that truncate the advanced planning objectives. These projects are eligible for funding and prioritization the same as other identified projects but because of timing or scope uncertainty may not be represented in the document. Staff is aware of projects that will very likely require future capital funding but are not represented in the Program at the time of publication. Those projects include the Pavilion, City Hall FFE, and various needs identified by master planning documents.

FUND SUMMARIES

Amarillo uses a combination of funding sources to fund the capital investments of this Program including debt, cash reserves, utility rate revenues, grants, and miscellaneous fee revenues. The following is a brief overview of each of the identified City Funds and typical funding sources for each.

General Fund

Historically, the City has preferred to fund capital projects in the General Fund on a pay-as-you-go basis from cash reserves made available from any previous year-end budget surplus. As budgets have tightened these available funds have reduced, a trend anticipated to continue. The City has established several specific improvement funds for major investments, such as streets, civic center, and solid waste, where funds may be transferred from the general fund to fund specific improvements in these areas. Other areas of investment, such as facilities and traffic, are funded through transfers into the General Construction fund.

For year one of the Program, General Fund transfers are noted below:

- Street Improvement Fund approximately \$2.3 million for resurfacing of various streets
- Solid Waster Collection approximately \$130 thousand for collection operations (E&I)

Enterprise Funds

The City operates three enterprise funds (Water & Sewer, Drainage Utility, Airport) which conduct business-like activities that sell specific products or services to the public. These funds are self-sustaining and do not require assistance from any of the City's other funds. Most of the revenue for these funds is used to fund operating costs and to provide adequate reserves to cover both operating costs and capital liabilities. Enterprise fund community investments are funded through a combination of pay-as-you-go from cash on hand, loans backed by dedicated rate increases, and grants in kind. For 2022/2023 \$59.2 million has been approved for water and sewer utility investments, including \$46.5 million in debt funding with an associated 5% rate increase to fund the annual debt service.

Internal Service Funds

Internal service funds are similar to enterprise funds in that they are used for business-like activities. However, in this case the customer is the City's various departments and service units. Investments in this fund include investments in fleet services and information technology. Revenue for these funds come from service charges to the various departments and service units, and these funds generally operate on a pay-as-you-go cash basis. For 2022/2023, investments in fleet services total \$7 million. It is anticipated increases in charges will be necessary to address these and future investment needs. The 2022/2023 operating budget includes rate increases for both fleet rental rates and IT charges. For planning purposes, this Program holds the available revenue steady for years two through five with a target value of \$6.5 Million. However, this will be reevaluated annually as part of the budgeting process.

Other Funds

Debt (General Obligation Bonds, Revenue Bonds, Certificates of Obligation, Tax Notes)
Upon voter approval, the City may issue general obligation bonds to fund community investments. In November 2016 voters approved approximately \$109 million in general obligation debt authorization. This authorization was specific funding for transportation and public safety investments. The fourth and final issuance of these bonds were issued January 2021. While the projects funded by this issuance influence the overall program greatly, they have all been previously presented and are no longer shown in this planning document.

- Grants

The City receives select grants from various federal and state agencies to assist in specific federally significant missions including transit operations and air transport. For

2022/2023 the grants received for capital investments are anticipated to total \$12.2 million including approximately \$3.8 Million in Federal Grants for the Airport.

- Outside Funding

The City receives funding from various private groups or organizations to assist in specific missions including support for transit operations, school liaison officer services, library services or Tax Increment Reinvestment Zones (TIRZ) related expenditures. For 2022/2023 the outside funding received for capital investments are anticipated to total \$130 thousand.

OPERATING BUDGET IMPACTS

As community investments are made on new, expanded, or renovated infrastructure and facilities, it is necessary to evaluate the impact on the annual operating budget. In many instances a savings may be realized - such as when an aging mechanical system is replaced, enabling greater efficiency and less maintenance demands. In other instances, new operating costs will be borne as a result of the investment. Understanding operating cost implications is critical because unlike the initial capital investment they represent an ongoing annual obligation to the City. In many instances these costs are incremental in nature meaning they may necessitate increasing resources for several years. While in the first year it may make little financial sense to increase the operating budget to accommodate this extension, over a period of four or five years it may become necessary to begin increasing budgets for personnel, equipment, and supplies accordingly. If operating budgets are not increased in a timely manner the reality is the level of service decreases across the entire system. The City evaluates the need to adjust the operating budgets in conjunction with CIP during the annual budgeting process. As new facilities and infrastructure come online operating budgets are adjusted accordingly in the year of budget impact. As part of the CIP process, departments and management examine the estimated operating impacts of their CIP projects, and those impacts are considered, along with future operating budget needs, to determine the feasibility of future projects.

Examples of operating impacts anticipated in future periods are outlined below. Once completed, the multimodal transportation terminal will bring on additional utility, operations, and maintenance costs of approximately \$160,000 a year. These costs will be partially offset by anticipated rent payments partnered with Federal and State grant revenue. This project is not projected to be completed until fiscal 2022/2023 at the earliest. Fire Station 14 approved for funding in FY 2022/2023 will have implementation impacts of approximately \$50,000 at the time of its construction completion to outfit the building for occupancy; as well as annual operations and maintenance costs of approximately \$8,000 per year.

FIVE-YEAR CIP IN SUMMARY

City Manager – Five-year total \$250 thousand

The City Manager's office has proposed to allocate approximately \$50,000 each year specifically for Grant Matching Funds. Each department is encouraged to seek out grant funding

opportunities and these matching funds are available on a first come first serve basis to departments with successful grant applications.

Emergency Management Services – Five-year total \$150 thousand

The City of Amarillo administers and directs a comprehensive inter-jurisdictional emergency management program to address the mitigation, prevention, preparedness, response, and recovery to all-hazards that could impact the City of Amarillo and Potter and Randall counties. For this Program, emergency service projects include multiple year replacements of radio communication equipment in multiple departments and continued expansion of the outdoor warning system.

Facilities Maintenance – Five-year total \$4.8 million

The City of Amarillo maintains, designs, and constructs facilities with an emphasis on keeping employees and citizens in a safe, secure, and professional work environment. The Facilities Department will oversee a number of the projects contained within this CIP in various program areas. This CIP includes major maintenance projects in various existing facilities, including roofing, air conditioning and lighting replacements and repairs.

Municipal Courts – Five-year total \$305 thousand

The City of Amarillo Municipal Courts strives to efficiently process and administer all matters coming into and before the Municipal Court. The Municipal Court strives to promote a high level of public confidence, accessibility, and a sense of fairness through efficient and courteous public service. This CIP includes maintenance projects for the Municipal Courts building correlated to projects being completed by the Facilities Department

Capital Projects and Development Engineering (CP&DE) – Five-year total \$250 thousand

The City of Amarillo facilitates and produces well-planned, well-designed, safe, lasting, and useful infrastructure and community improvements. This CIP includes funding to facilitate a community infrastructure funding conversation that was initiated with the Partnership on Development Progress (PDP).

Police Services – Five-year total \$2.4 million

The Amarillo Police Department (APD) is responsible for providing police services, including the preservation of peace and order, prevention and detection of crime, apprehension of offenders, protection of persons and property under the laws of the State, protection of the innocent, enforcement of the laws of the State and the ordinances of the City, and performance of a multitude of tasks related to public safety and welfare. This Program includes projects intended to facilitate the AISD and CISD Liaison Officer program, improve officer safety, improve work conditions, and deliver a higher level of service.

Planning and Neighborhood Enhancements – Five-year total \$10.7

The City of Amarillo in partnership with Potter County has undertaken a multi-year effort at revitalizing distressed neighborhoods. This effort began with a community driven planning process that results in tangible service and physical improvements in the neighborhood. The CIP Program includes funding for grant funded transportation projects identified by the neighborhood planning process.

Traffic – Five-year total \$3.4 million

Traffic operations provide the City of Amarillo with effective and efficient traffic control devices that maximize safety, quality and reliability, while minimizing travel time, inconvenience and expense for the traveling public and taxpayers. This Program includes projects such as upgrading existing traffic signals, pavement marking replacements, and replacement of arterial street illumination.

Transit – Five-year total \$877 thousand

In partnership with the Federal Transit Administration (FTA) and the Texas Department of Transportation (TxDOT), the City of Amarillo strives to provide courteous, dependable, and efficient public transportation in a cost-effective manner. This Program focuses on the ongoing replacement of aging buses.

Parks and Recreation – Five-year total \$41.4 million

Amarillo seeks to enhance the quality of life for Amarillo citizens through quality parks, programs and people. This Program includes a multitude of projects identified by the recently completed parks asset management plan. Proposed priorities include funding for miscellaneous maintenance, expansions, and improvements to the existing parks, golf courses, and pools. The department is forecasting the need for debt funding in the amount of \$34.4 Million dollars in the year three.

Fire Services – Five-year total \$5.6 million

Amarillo Fire Department (AFD) and the Office of the Fire Marshal strive to protect lives and property in our community by providing the highest quality of professional fire services. This Program includes extensive enhancements of the facilities and equipment used for fire services. Smaller projects included in this Program are existing equipment and training facilities replacement and upfitting. Larger projects included in the Program include the planning, design, and construction of new Fire Station 14.

Streets- Five-year total \$98.3 million

The City of Amarillo strives to provide the public with a safe network of clean, well-maintained streets and alleys as cost-effectively as practical. This Program seeks to strike a balance between the needs associated with rehabilitation and replacement of existing streets and expansion of new streets to accommodate new development areas. This Program identifies a level of spending consistent with recommendations for a Pavement Condition Report commissioned by the

department including proposed debt funding in the amount of \$84.7 Million dollars. Projects in this Program include the reconstruction of 5th Street and Bowie Street in coordination with the Transit Departments new bus terminal and the annual allocation for general street resurfacing.

Solid Waste Collection and Disposal – Five-year total \$6.5 million

The Solid Waste department provides for the safe and efficient collection and disposal of residential and commercial solid waste within the city limits, ensuring the health, safety and welfare of residents, commercial customers, and employees. This Program includes funding for the next phases of cell development at the landfill as well as operations projects.

Civic Center – Five-year total \$5.5 million

The Amarillo Civic Center Complex (ACCC) provides several venues used to enrich the community by hosting a variety of experiences. These venues are included in the Civic Center and the Amarillo Globe News Center for the Performing Arts. This Program includes projects focused on rehabilitation of ACCC facilities to maintain their quality and ability to meet demands. Specific projects include ice plant repairs, portable wall replacements, facility repairs, and other improvements.

Water and Sewer Utilities – Five-year total \$240.2 million

The City of Amarillo is committed to supplying continuous high-quality water, sewer and environmental services to our customers in a safe and efficient manner, supporting Amarillo's high quality of life now and in the future. This Program includes many projects intended to address aging infrastructure and accommodate new development, such as new interceptor lines, utility relocations, treatment plant enhancements, and a new proposed Wastewater treatment facility. The department is forecasting the need for debt funding in the amount of \$124 Million dollars in years four and five.

Drainage Utility – Five-year total \$24.2 million

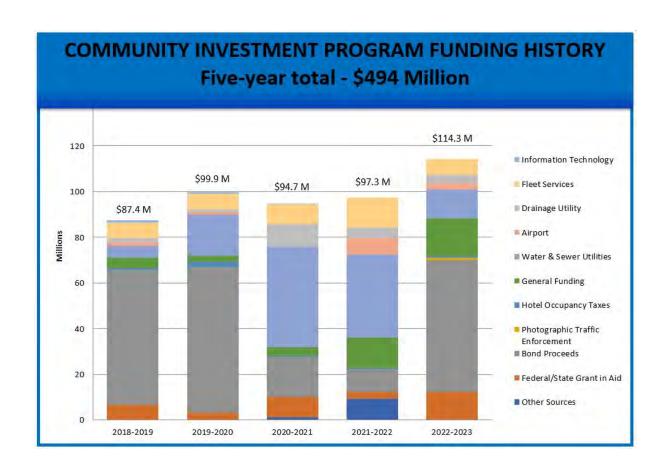

The City of Amarillo strives to ensure drainage is safely and efficiently managed throughout the City. This Program focuses on several projects intended to address current drainage needs and accommodate needs associated with new development. Specific projects include repairs to existing facilities downtown to address flooding of local underpasses, rehabilitation of existing storm drains and pumps, and purchase of equipment.

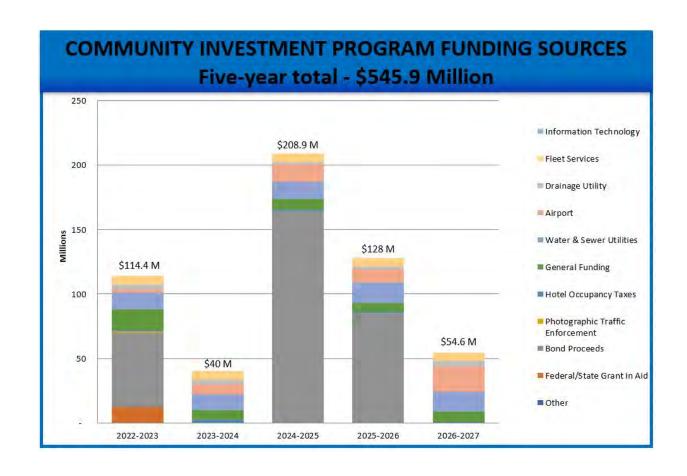

Airport – Five-year total \$57.2 million

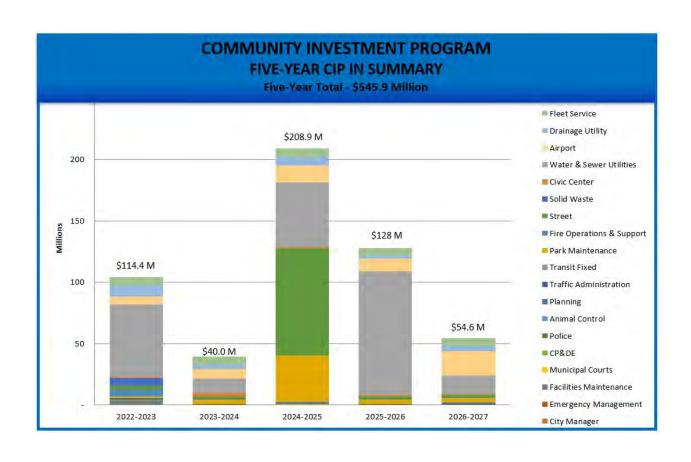

The City of Amarillo, in partnership with the Federal Aviation Administration (FAA) and TxDOT, strive to provide high-quality, reliable and safe facilities and operations for air travel for residents and businesses throughout the Texas Panhandle. This Program includes projects aimed at rehabilitating existing facilities, and where appropriate, expanding facilities to meet increased demand. Specific projects include rehabilitation projects associated with parking facilities, taxiway and runway rehabilitation and the purchase of equipment.

Fleet Services - Five-year total \$33 million

The City of Amarillo is committed to enhancing City services by providing departments with safe and effective vehicles and equipment. Fleet Services ensures the responsible use of tax dollars by managing the acquisition, maintenance, and disposal of the City's fleet in the most cost-effective manner possible. Fleet Services is committed to providing City departments with high quality repair and maintenance services in a manner that minimizes equipment down-time and interruption of City services to Amarillo citizens. The City performs this service by assessing an annual rental charge for each piece of equipment used by City departments, thus ensuring its adequate maintenance and timely replacement. This Program includes the funding necessary to achieve these objectives.

FUTURE CONSIDERATIONS

As stated previously the first year of the CIP Program is adopted with that year's budget and thereby fiscally constrained by that budget. Conversely, years two thru five are not completely fiscally constrained but rather identified and prioritized with typical and reasonable sources of revenue. This is an intentional planning function allowing the departments to forecast imminent needs while being aware of the constraints of, and impacts on, the organizations budget. Council identified priorities and policies are reflected in the prioritization of years two thru five as the establishment of what is typical and reasonable fiscal constraint. This allows the organization to discuss, research, and plan for future debt proposals as well as forecast identified capital demands. Generally, projects identified in years two thru five can be considered the highest priority unfunded needs of the organization.

Additionally, the CIP Program identifies future projects outside the five-year planning window but within a 20-year forecasting window. These future projects are identified by the departments without fiscal constraint. As a planning function this allows departments to identify and report future needs even if a funding source is not known. It functions as a clearing house of identified needs to combat the loss of institutional knowledge by way of staff turnover, and forecasts anticipated funding needs for future priority and policy decisions.

In the 2022/2023 to 2026/2027 Program there is over \$1.76 Billion in identified future projects. Each project is unique even if the project name is identical. This could mean the project is anticipated to be repetitive in the 20-year planning window, or a small part of a larger identified achievement. The following table lists the identified future projects.

Annual CIP Process

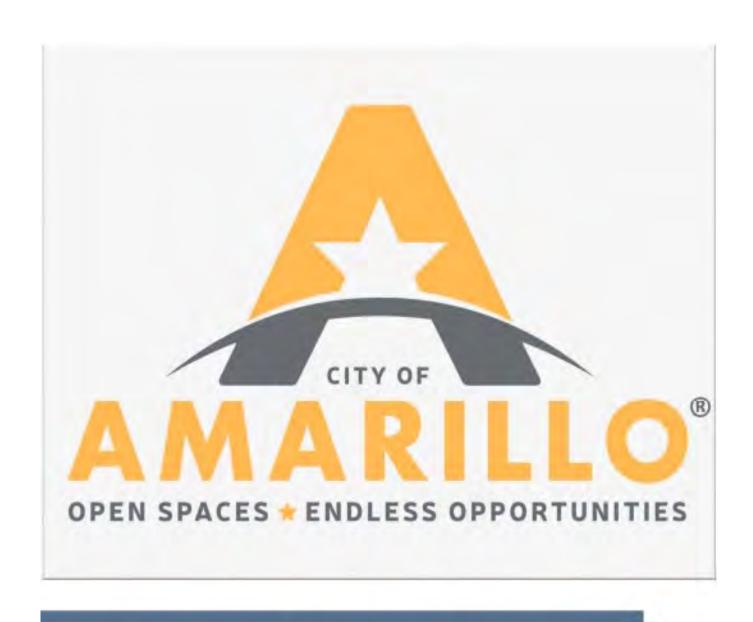

The model used for the development of the annual CIP is noted in the graphic below. The process begins with community priorities. Citizens are Engaged by City Staff to understand expectations and gauge success and failures of the existing programs. This information is often obtained and contained in strategic or comprehensive plans. These priorities in turn inform finer-grained plans (master plans, neighborhood plans, etc) and assessments (pavement quality, efficiency analyses, etc). From these priorities, plans, and assessments; staff refines the proposed list of year-one projects to be considered for inclusion in the current budget year, adjusts prioritization of previously identified projects and proposes new projects to be added to years two thru five of the CIP. Council considers and approves the first-year projects with the annual operating budget and approves the proposed five-year CIP along with or after the annual operating budget. The general timeline for this process is noted on the following page.

Citizen Engagement Council Priorities Comprehensive/Strategic Plans Master Plans
Neighborhood, District,
Corridor Plans
Assessments &
Evaluations

Multi-Year Funded CIP
Enhanced Project
Administration and
Management

Typical Operating Budget and CIP Annual Development Timeline

- ➤ January/February Departments review the current five-year CIP to identify any possible refinements to what will become the new year-one projects.
- February/March Departments propose projects through Capital Projects & Development Engineering to be considered for the "new" year-five projects.
- ➤ March/April Capital Projects & Development Engineering (CP&DE) reviews and assesses proposals from the Departments. CP&DE evaluates the status of previous CIPs, existing planning documents, and Council guidance documents to establishes prioritization criteria.
- > April CP&DE makes recommendations for revisions of the CIP to City Management.
- > April/May Operating budget proposals and CIP are submitted to Finance.
- June Operating budget proposals and CIP are submitted to City Manager for review.
- > June/July City Manager reviews proposed operating budget and CIP with Management Team.
- July City Manager submits proposed operating budget and year-one of CIP to City Council.
- > July Council reviews City Manager's proposed operating budget and year-one of CIP.
- August Council conducts public hearings on proposed operating budget and year-one of the CIP and considers approval.
- October Approved operating budget and year-one of CIP go into effect and Council reviews and approves full five-year CIP.

5-Year CIP Project Details City Manager's Office

1020 - City Manager

Project Number: 411907

City Council Pillars: CUSTOMER SERVICE, FISCAL RESPONSIBILITY

City Manager Initiatives: IMPLEMENTATION OF BEST PRACTICES, PUBLIC SERVICE AND

ENGAGEMENT

Map Section/Quadrant: / CW

Group: LAURA STORRS

Department: City Manager

Division: 1020 - City Manager

Fund: 04100 - General Construction Fund

Project Name: Grant Matching

Description: This project will allow multiple departments to pursue grant opportunities and seek

matching funds from this project. The funds will be on a first come first serve basis, and

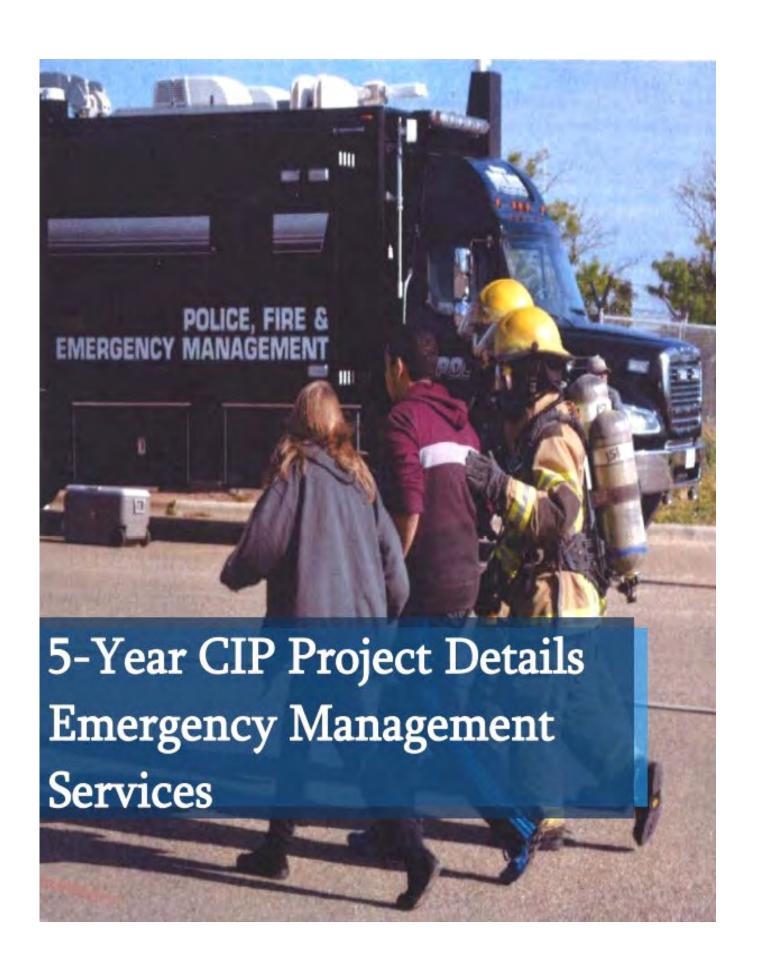

at the discretion of City management.

Estimated Capital Expenditure

Division: 1415 - Capital Projects & Development Engineering

Fund: 04100 - General Construction Fund

Project Name: Infrastructure Funding Study

Description: During the previous year, the City of Amarillo has facilitated an initiative named the

Partnership on Development Progress. This initiative engaged a citizen committee who developed their own mission statement of: Creating a comprehensive roadmap to grow, sustain, and develop opportunity for Amarillo. One of the directives of the Citizen committee was to explore basic infrastructure funding options specifically for future growth, and how future growth has an impact on the basic infrastructure system. CP&DE is requesting capital funding to evaluate the existing ordinances, policies and infrastructure Master Planning documents and recommend revisions as required to be able to implement the recommendations of the PDP committee.

Project Name: Runway Rubber Removal Project

Description: Removal of rubber build up at the approach end of each runway by water blasting. This

project is a best practice initiative to support the evaluation and maintenance of high skid resistance (runways). As required by FAR Part 139, runway rubber removal must be

performed on an as needed basis. Based on recent observations and friction

measurement testing on both Runway 4-22 and Runway 13-31, this project is needed annually in order to remain in compliance with the FAA approved Airport Certification

Manual.
